# INTRODUCTION :

The Tableau HR Scorecard is a framework designed to measure and evaluate the success of talent management strategies within an organization. It provides a way for HR professionals and business leaders to track and analyze key performance indicators (KPIs) related to workforce planning, recruitment, retention, and development.

The HR Scorecard consists of four main perspectives:

1. **Financial Perspective:** This perspective focuses on the financial impact of HR initiatives, such as the cost of recruitment, training and development, compensation and benefits, and turnover.
2. **Customer Perspective:** This perspective measures the satisfaction of internal and external customers of HR services, including employees, managers, and job candidates. It includes KPIs such as employee engagement, manager satisfaction with HR support, and candidate experience.
3. **Internal Process Perspective:** This perspective assesses the effectiveness and efficiency of HR processes, such as recruiting, onboarding, performance management, and employee development. It includes KPIs such as time to fill vacancies, time to productivity for new hires, and training hours per employee.
4. **Learning and Growth Perspective:** This perspective evaluates the organization's investment in employee development and its ability to innovate and adapt to changing business needs. It includes KPIs such as employee skills and competencies, employee retention, and the percentage of employees who receive regular training and development.

### Says

What have we heard them say?  
What can we imagine them saying?

We need to track the effectiveness of our talent management strategies

Understanding the impact of our HR initiatives is crucial

We're looking for clear visualizations to make sense of talent data

Attends meetings to discuss talent management progress

Shares HR scorecard findings with senior management

### Does

What behavior have we observed?  
What can we imagine them doing?

Engages with the HR team to gather data and insights

### SURULIRAJ TEAM

Measuring success in talent management

[See an example](#)

### Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

I hope the scorecard provides actionable insights

How can we prove the ROI of our talent management efforts?

Is there a better way to communicate our progress to stakeholders

concerned that certain areas might need improvement

Excited about the potential for better decision-making through data

### Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?

### Brainstorm & idea prioritization

1. ☐ 100% correct  
 2. ☐ 75% correct  
 3. ☐ 50% correct  
 4. ☐ 25% correct

8. Write out all permutations of the 4 boys and 4 girls, and write the number of times each boy is asked to give a speech. Is the boy's position related to the number of speeches?

- Team gathering**  
Before the start of each chapter in the summer and winter  
series. Every teacher should have a copy with them.
- Write your**  
Write your first chapter quickly (during the summer  
or winter break).
- Learn to write your first chapter**  
Learn to write your first chapter (during the summer  
or winter break).

What questions are you trying to ask? Frame your question as a *How Might We...* statement. This sets up the focus of your thinking.

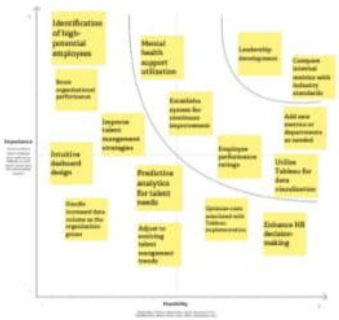

- 

Write about why these three issues are most important to your public health department.

- | Person 1  | Person 2                                | Person 3  | Person 4   |
|---|---|---|--|
| 1. Retrieve data from various systems in the organization | 1. Improve talent management strategies | 1. Intuitive dashboard design                       | 1. Establish a system for continuous improvement |
| 2. Add new metrics or departments needed                  | 2. Enhance HR decision-making           | 2. Utilize Tableau for data visualization           | 2. Adjust to evolving talent management trends   |
| 3. Optimize costs associated with talent implementation   | 3. Boost organizational performance     | 3. Compare internal metrics with industry standards | 3. Employee performance ratings                  |

Don't be afraid showing your ideas while discussing them. It's better to be wrong than to be silent. Great ideas come from being stupid, so don't be afraid to be stupid in the name of a better idea. It's better to be stupid than to be afraid to be stupid. If you can't think of a better idea, then you're not thinking hard enough.

- Mental health support utilization   Leadership development progress   Identification of high-potential employees   Predictive analytics for talent needs

## Advantage :

Tableau provides powerful visualization capabilities, allowing you to create intuitive dashboards and reports. This makes it easier to understand and communicate complex HR metrics and trends.

HR scorecards can include a wide range of metrics, covering aspects like recruitment effectiveness, employee engagement, turnover rates, training and development, and more. Tableau allows you to integrate various data sources to provide a holistic view of talent management.

Tableau can be set up to pull in data in real-time, providing the most up-to-date information on your talent management initiatives. This enables quick decision-making and the ability to respond promptly to changing circumstances.

## Disadvantage :

Setting up a comprehensive HR scorecard in Tableau can be complex, especially if the organization lacks the necessary expertise in data analytics and visualization. It may require significant time and resources to design, implement, and maintain.

The accuracy and reliability of HR metrics in Tableau heavily rely on the quality of the underlying data. If there are discrepancies, errors, or inconsistencies in the data sources, it can lead to misleading insights and inaccurate assessments of talent management success.

Integrating various data sources into Tableau can be challenging, especially if the organization uses multiple HR systems that may not seamlessly interact with the Tableau platform. This could lead to delays or complications in data aggregation.

## Application :

Training and development  
Performance management  
Career development  
Succession planning  
Employee onboarding  
Recruitment and selection

## Conclusion :

The HR scorecard for our talent management project in Tableau provides a comprehensive overview of our efforts in optimizing talent acquisition, development, and retention. Through rigorous data analysis, several key insights have emerged:

## Future scope :

- 1) It will be use for Predictive Analytics and AI integration
- 2) It will be use for advanced visualizations Techniques
- 3) It will be use for Global workforce Analytics
